

Graph.h

```
graph TD; Graph.h --> Station.h; Station.h --> string; Station.h --> iostream;
```

The diagram illustrates a set of header file dependencies. At the top is a box labeled 'Graph.h'. A blue arrow points from 'Graph.h' down to a box labeled 'Station.h'. From 'Station.h', two blue arrows point downwards to two separate boxes: 'string' on the left and 'iostream' on the right. The boxes for 'Graph.h' and the bottom two boxes have a gray background, while the 'Station.h' box has a white background.

Station.h

string

iostream
